

Right to data portability

The right to data portability allows our customers to obtain and reuse their personal data for their own purposes across different services. It allows them to move, copy or transfer personal data easily from one IT environment to another in a safe and secure way, without any hindrance to usability.

The right to data portability only applies to personal data our customers have provided to Bluecode Labelling Technology where the processing is based on the customers consent or for the performance of a contract. Bluecode Labelling Technology will provide the personal data in a structured, commonly used and machine-readable format free of charge.

If requested Bluecode Labelling Technology will transmit the data directly to another organisation where possible.

Bluecode Labelling Technology aim to address any requests within one month of receipt.
